STANDARD PRODUCT SELL SHEET

# Premium flash frozen pizza dough built for consistent foodservice execution.

Forno Medici dough balls help restaurants, pizzerias, hotels, resorts, entertainment venues, and foodservice operators deliver artisan-style pizza with less labor, less waste, and dependable bake performance.

- Authentic Italian-style formulation using premium 00 flour
- Flash frozen at peak fermentation to protect structure, flavor, and stretch
- Individually portioned dough balls for portion control and operational efficiency
- Designed for high-volume foodservice environments requiring consistency across teams

## WHY OPERATORS LIKE IT

- Reduces scratch-dough labor without compromising premium pizza quality
- Consistent handling and bake performance across shifts and teams
- Long frozen shelf life supports inventory planning and spoilage reduction
- Simple thaw-rest-stretch workflow supports efficient service during peak traffic

# The Forno Medici advantage

### Premium product quality

- Clean, simple formula with no eggs or dairy
- Excellent extensibility and dough strength from premium 00 flour
- Potential for strong oven spring and artisan-style bake characteristics
- Balanced chew, light interior structure, and authentic pizzeria-style results

### Operational fit for foodservice

- Individually wrapped format supports sanitation, portioning, and controlled thawing
- Multiple dough weights support personal, shareable, and specialty pizza menus
- Works across deck, conveyor, convection, conventional, and high-heat pizza systems
- Allows teams to thaw only what service requires, reducing spoilage risk

# Available size and packaging options

| Product code | Description | Unit weight | Units/case | Case weight |
|---|---|---|---|---|
| 77100 | Individually wrapped | 100 g (3.5 oz) | 90 | 7.65 kg (16.85 lb) |
| 77170 | Individually wrapped | 170 g (6 oz) | 60 | 10.20 kg (22.5 lb) |
| 77227 | Individually wrapped | 227 g (8 oz) | 48 | 10.88 kg (24 lb) |
| 77283 | Individually wrapped | 283 g (10 oz) | 36 | 10.20 kg (22.5 lb) |
| 77340 | Individually wrapped | 340 g (12 oz) | 30 | 10.20 kg (22.5 lb) |
| 77396 | Individually wrapped | 396 g (14 oz) | 24 | 9.52 kg (21 lb) |
| 77454 | Individually wrapped | 454 g (16 oz) | 24 | 10.88 kg (24 lb) |
| 77567 | Individually wrapped | 567 g (20 oz) | 15 | 8.50 kg (18.75 lb) |
| 77737 | Individually wrapped | 737 g (26 oz) | 14 | 10.32 kg (22.5 lb) |
| 77907 | Individually wrapped | 907 g (32 oz) | 12 | 10.88 kg (24 lb) |

Additional specifications, palletization details, nutritional documents, pricing, and sample support are available upon request.

# Handling, storage, and baking

### Storage and preparation

- Store frozen at -18 C (0 F) or below
- Frozen shelf life: up to 12 months
- Once thawed, refrigerated shelf life: up to 4 days
- Thaw in refrigerator for 24 hours, then rest at room temperature for 30-40 minutes before stretching

### General baking guidelines

- Deck oven: 500 F for 8-10 minutes
- Convection oven: 425 F for 8-10 minutes
- Conveyor oven: 500 F for 6-8 minutes
- Conventional oven: 450 F for 12-15 minutes
- Final bake profile may be adjusted by oven type, pizza style, toppings, and operational conditions

# Why the dough performs better

### Preservation of structure

- Rapid freezing limits large ice crystal formation that can damage dough structure and yeast viability
- Helps maintain elasticity, extensibility, and fermentation integrity after thawing

### Flavor and fermentation

- Locks in flavor developed during fermentation, including nutty, wheaty, slightly sweet notes
- Supports artisan-style results on demand without daily scratch production

### Consistency at service

- Predictable handling characteristics improve results across shifts, teams, and locations
- Individually portioned dough supports repeatable menu execution and portion control

### Lower operational complexity

- Reduces prep time, training burden, and waste compared with managing fresh dough programs
- Supports scalable deployment across single-unit, multi-unit, and distribution-driven programs

**Ingredients:** 00 flour (niacin, reduced iron, thiamine mononitrate, riboflavin, folic acid), water, olive oil, salt, yeast, sugar, ascorbic acid, L-cysteine hydrochloride.
**Allergen statement:** Does not contain eggs or dairy.

**Support available:** Samples, specification review, menu-fit discussions, and commercial pricing can be prepared for distributor, culinary, and sourcing teams.
