

PRODUCT SELL SHEET

Premium flash frozen pizza dough built for consistent foodservice execution.

Forno Medici dough balls help restaurants, pizzerias, hotels, resorts, entertainment venues, and foodservice operators deliver artisan-style pizza with less labor, less waste, and dependable bake performance.

- Authentic Italian-style formulation using premium 00 flour
- Flash frozen at peak fermentation to protect structure, flavor, and stretch
- Individually portioned dough balls for portion control and operational efficiency
- Designed for high-volume foodservice environments requiring consistency across teams

WHY OPERATORS LIKE IT

- Reduces scratch-dough labor without compromising premium pizza quality
- Consistent handling and bake performance across shifts and teams
- Long frozen shelf life supports inventory planning and spoilage reduction
- Simple thaw-rest-stretch workflow supports efficient service during peak traffic

The Forno Medici advantage

Premium product quality

- Clean, simple formula with no eggs or dairy
- Excellent extensibility and dough strength from premium 00 flour
- Potential for strong oven spring and artisan-style bake characteristics
- Balanced chew, light interior structure, and authentic pizzeria-style results

Operational fit for foodservice

- Individually wrapped format supports sanitation, portioning, and controlled thawing
- Multiple dough weights support personal, shareable, and specialty pizza menus
- Works across deck, conveyor, convection, conventional, and high-heat pizza systems
- Allows teams to thaw only what service requires, reducing spoilage risk

Available size and packaging options

Product code	Description	Unit weight	Units/case	Case weight
77100	Individually wrapped	100 g (3.5 oz)	90	7.65 kg (16.85 lb)
77170	Individually wrapped	170 g (6 oz)	60	10.20 kg (22.5 lb)
77227	Individually wrapped	227 g (8 oz)	48	10.88 kg (24 lb)
77283	Individually wrapped	283 g (10 oz)	36	10.20 kg (22.5 lb)
77340	Individually wrapped	340 g (12 oz)	30	10.20 kg (22.5 lb)
77396	Individually wrapped	396 g (14 oz)	24	9.52 kg (21 lb)
77454	Individually wrapped	454 g (16 oz)	24	10.88 kg (24 lb)
77567	Individually wrapped	567 g (20 oz)	15	8.50 kg (18.75 lb)
77737	Individually wrapped	737 g (26 oz)	14	10.32 kg (22.5 lb)
77907	Individually wrapped	907 g (32 oz)	12	10.88 kg (24 lb)

Handling, storage, and baking

Storage and preparation

- Store frozen at -18 C (0 F) or below
- Frozen shelf life: up to 12 months
- Once thawed, refrigerated shelf life: up to 4 days
- Thaw in refrigerator for 24 hours, then rest at room temperature for 30-40 minutes before stretching

General baking guidelines

- Deck oven: 500 F for 8-10 minutes
- Convection oven: 425 F for 8-10 minutes
- Conveyor oven: 500 F for 6-8 minutes
- Conventional oven: 450 F for 12-15 minutes
- Final bake profile may be adjusted by oven type, pizza style, toppings, and operational conditions

Why the dough performs better

Preservation of structure

- Rapid freezing limits large ice crystal formation that can damage dough structure and yeast viability
- Helps maintain elasticity, extensibility, and fermentation integrity after thawing

Flavor and fermentation

- Locks in flavor developed during fermentation, including nutty, wheaty, slightly sweet notes
- Supports artisan-style results on demand without daily scratch production

Consistency at service

- Predictable handling characteristics improve results across shifts, teams, and locations
- Individually portioned dough supports repeatable menu execution and portion control

Lower operational complexity

- Reduces prep time, training burden, and waste compared with managing fresh dough programs
- Supports scalable deployment across single-unit, multi-unit, and distribution-driven programs

Ingredients: 00 Flour, Water, Vegetable Oil Shortening(Soybean and/or Canola), Yeast, Sugar, Salt, Ascorbic Acid.

Allergen statement: Does not contain eggs or dairy.

Support available: Samples, specification review, menu-fit discussions, and commercial pricing can be prepared for distributor, culinary, and sourcing teams.
